

For Immediate Release

Louisiana Clerks of Court Launch Statewide Portal

Cloud Based Portal Available for Participating Parish Land Records

Baton Rouge, LA – The Louisiana Clerks of Court Association and Antares Technology Solutions, a Louisiana based software development and information technology consulting company, announced that its cloud-based portal for access to statewide land records has been launched. The Statewide Portal provides secure remote access by registered users to searchable copies of the official parish indices of land records for both mortgages and conveyances. Fifty-three parishes have signed up to participate and are in various stages of the onboarding process to provide daily uploads of mortgage and conveyance transaction data.

The Clerks' Statewide Portal, www.laclerksportal.org, provides public information on the availability of land records of participating clerks of court and includes hyperlinks to the desired clerks' websites who are the custodians of the records identified through searches conducted via the Statewide Portal. Marriage license information has recently been approved and included as another data search option added to the Portal.

According to Debbie Hudnall, Executive Director for the Louisiana Clerks of Court Association, "We're pleased that the Statewide Portal provides a one stop location for easy search access to all participating parish land record information and soon marriage licenses. This allows our clerks the ability to provide accurate and timely information via the web as well as traditional methods."

"Antares is pleased to be the Clerks software partner providing secure cloud-based services to streamline communication between parishes and their customers," said Ralph Melian, Antares president. "Cloud-based portals are a powerful communication channel that continue to shift the way governmental agencies conduct business."

About Antares Technology Solutions

Antares is a leading software development and information technology consulting company celebrating more than 28 years of providing quality software solutions to its clients. With offices in Baton Rouge and New Orleans, LA, and presence in Austin, TX, Antares' professionals possess a broad base of IT knowledge to solve business problems through custom application development - .NET, Cloud, Web, Mobile and database applications; offer dedicated project teams, and Workflow & Forms Automation. Since 1988, Antares has provided software strategy, design, development, and support to customers ranging from government and Fortune 500 companies to small- and mid-sized businesses.

About Louisiana Clerks of Court Associations / LCRAA

The Louisiana Clerks of Court Association was created in order to provide efficient and effective representation of its 64 parish Clerks of Court members and other statewide Clerks. The role of the Clerk of Court in each parish is to maintain and preserve the official records of the parish including processing and recording all land records, UCC documents, civil and criminal court proceedings, marriage licenses and other miscellaneous legal documents. In addition, each Clerk oversees all elections, election equipment and election personnel. The Louisiana Clerks' Remote Access Authority was created to provide for infrastructure, governance, standard operating procedures, technology, and training to support a statewide portal for secure remote access by Internet users to certain records maintained by LCRAA members and to provide for document preservation.
